DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-18 and 27-29, drawn to a method of aligning print media and a method of moving print media, classified in class 271, subclass 226.
- II. Claim 1-16 and 19-26, drawn to a media registration mechanism, a media steering mechanism and an image forming device, classified in class 271, subclass 234.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by any apparatus that can perform the recited operational steps in claims 17-18 and 27-29. In other words, the process as claimed can be practiced by another materially different apparatus.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3653
